

Project Name: Special Interest Group Portal

Project Team: Team Grapes

Document: Customer Notes

Summarized Customer Notes From Feb 2, 2024 Check-Ins

1. Make an easy to use and easy to evolve website for The Engineering and Humanities Special Interest Group (SIG).
2. Target audiences are engineering educators, researchers, students and SIG members, but as of now the platform will only be for SIG members.
3. Research papers sharing should be the main focus for design.
4. Two types for logins: Admin and SIG members. Public don't require the login.
5. SIG member login requires CEEA membership.
6. SIG members can't login to the website if he/she has due the CEEA membership payment.
7. SIG members with a member page and individual login to maintain individual profiles.
8. SIG members can share current research interests with other members of the group, can collaborate on common topics and can see other members' details.
9. SIG members may collaborate on common topics so no overlapping of the same research.
10. Emailing system that automatically sends mails to SIG members.
11. The president of SIG can receive the current members list through mail.
12. Research papers will be uploaded on SIG website after the annual CEEA proceeding.
13. The design can member only community pages for sharing photos and videos if possible.
14. Through the main page, everyone can get information on SIG events, view the network and location of researchers through mapping, as well as switch language between English and French (Bilingual support).
15. Data and functions should be easily understandable and discoverable.
16. Currently SIGs cannot see other SIG members work, who are working with similar things.
17. SIGs wants to display information in a nice way (Data to wisdom) dynamic dashboard.
