

**Project Name:** Special Interest Group Portal

**Project Team:** Team Grapes

**Document:** Tim's Notes

**Summarized Customer Notes From Apr 05 2024 Check-Ins**

- The professor likes our map functionality on the home page. If we click on any marker it will take you to the SIG member's profile which is located on that particular marker's location.
- Need to remove countries' flags from bilingual plugin functionality..
- Redesign the home page. Need to put a map near the top of the homepage so that folks visiting a website can play with it.
- Increase the size of the logo on a navbar.
- Use blog functionality on profile pages.
- Currently, under community, we have Interest Groups and Interest Topics which can confuse customers so need to rearrange this.
- Need to change the image on the homepage which is currently a human hand and a robot hand typing to do a handshake because as per the professor, it is not good and scary.
- In an Interest Group, we have to type and add a blog so that every person in the same group can see new updates.
