Project Name: Special Interest Group Portal

Project Team: Team Grapes

Document: Customer Notes

Summarized Customer Notes From Mar 22 2024 Check-Ins

- Friending and unfriending functionality should not be there.
- A website should not have the research interests as the main groups.
- Static world clouds are not a good idea.
- There will be only one group, the Humanities and Engineering, and groups based on Interest topics are subgroups.
- Forums are interesting but add dynamic interest and research papers from the profile and we must keep forums on our website.
- Change the flag of the English language which is currently Canada in bilingual functionality.
